

## **Chapter 2. Bottled Water & Sodas**

**Our environment at 8,000 feet is dry! Dehydration is an issue! We strongly suggest you have bottled water available to all guests before your ceremony, before your reception/party/event, and as they are leaving! We suggest you plan at least two 10 oz bottles per person.**

**If it is mid summer or an afternoon event, consider planning at least three bottles per person.**

**If you are horse back riding, hiking, rock climbing or any other “active activities,” plan on four or five bottles per person.**

**We will provide unlimited water and lemonade (or similar) during the event. But you should still plan at least two 10 oz bottles per person available before and after.**

**Hint: We strongly suggest that when guests arrive, they be greeted with a bottle of cold water! This can prevent mid-ceremony dramas in the congregation! *Only the groom is allowed to pass out during the ceremony!***

**If you have a preferred brand of bottled water, we can probably get it for you!**

**We stock many sodas, and can order a variety of upscale sodas.**
